ABC Metro Washington & ABC Virginia Announce 2022 Excellence in Construction Awards Winners

Tysons Corner, VA – The Metro Washington and Virginia Chapters of Associated Builders and Contractors, Inc. (ABC) honored the winners of the 41st annual Excellence in Construction Awards, September 21st, at the Ritz Carlton in Tysons Corner, VA. The annual Excellence in Construction Awards recognizes and celebrates outstanding projects built by Washington-area ABC members. The awards competition serves to raise the level of construction standards throughout the industry by recognizing the workmanship of those who contribute and by showcasing the results of their dedication.

ABC contractors entered 150 projects in categories including, but not limited to, commercial, commercial/residential renovation, drywall, educational, electrical, excavation/site preparation, heavy/industrial/transportation, historic restoration, industrial, interiors, landscaping, masonry, mechanical, medical renovation, mega project, mixed-use, residential, restaurant interior build-out, retail and specialty.

“These winning projects highlight and honor the extraordinary teamwork between general contractors, architects and engineers, specialty contractors and material suppliers,” said Patrick Dean, president, ABC Virginia Chapter.

A large panel of industry experts served as the competition’s judges. This year’s panel included industry professionals from a cross-section of the building industry, including architects, owners, government officials and other industry leaders around the Washington metro-area.

“More than 100 judges reviewed the entry submittals and visited each project site to select the award winners,” said Daniel Bond, president, ABC Metro Washington. “Projects were judged based on complexity, unique challenges overcome, completion time, workmanship, innovation, cost and safety.”

The evening also honored members of the construction team with the presentation of 15 Subcontractor of the Year Awards. Subcontractor of the Year Awards were presented in the following categories: concrete; doors and windows; drywall and ceiling; electrical; finish carpentry and architectural millwork; fire protection; furnishings; landscaping; masonry; mechanical; metals; paintings and wall coverings; plumbing; site work; stone, tile, flooring and carpet; and thermal and moisture protection.
