# EXCELLENCE IN CONSTRUCTION 2014 Awards and Ceremony

The annual Metropolitan Washington Excellence in Construction awards program honors the outstanding quality construction produced by members of Associated Builders and Contractors' (ABC's) Metropolitan Washington and Virginia Chapters.

This year, more than 120 projects were entered in over 30 different categories. The high level of excellence exhibited in all of the entries proved a challenging task for more than 100 judges who reviewed the projects.

Teamwork and cooperation between general contractors, specialty contractors, and material suppliers are prerequisites for building excellence into any construction project. Tonight, we also honor members of the construction team by presenting Subcontractors of the Year Awards. General contractors from over 100 ABC members voted for this year's winners.

Through this annual awards program, ABC continues its commitment to quality construction in the Washington area. We want to thank all of those who have contributed to this year's competition, including the judges who volunteered their time, the companies that entered projects, their subcontractors and suppliers and, of course, all of this year's winning contractors for their commitment to the pursuit of excellence in construction.
