## **Facchina Construction Promotes Paul Barry, Jeff Siddens to Vice President**

La Plata, MD, March 3, 2016 – FACCHINA, a diverse construction contractor with offices in the Washington, DC area down to Miami, announced last week the promotion of Paul Barry and Jeff Siddens, both Vice Presidents of Facchina. Mr. Barry and Mr. Siddens will be responsible for ensuring efficient operation of Facchina's projects through their leadership on the company's executive team.

Paul Barry has been promoted to Vice President of Concrete and Special Services. Mr. Barry has been with Facchina for 24 years. Prior to this promotion he served as the company's Concrete Frames Executive. With decades of seasoned experience and projects such as Dulles Airport and Reagan National completed during his tenure with Facchina, Mr. Barry helped launch Facchina's Concrete Frames Division back in 1997. Now in its 20th year, the group has over 110 projects completed and has developed a recognized brand as the contractor of choice for the most complex and challenging structures in the greater Washington/Baltimore market.

Paul is a Georgia Institute of Technology graduate and has a Bachelor's degree in Engineering Economic Systems. "With over 20 years of my life devoted to this company, I feel a personal responsibility to build an organization that continues to provide great career opportunities for the men and women of Facchina into the next generation. We do this by remembering and passing on the fundamental values that have made the company great, while having the foresight to recognize and develop the capabilities that will deliver exceptional value to our customers and enhance our communities for generations to come," Mr. Barry shared.

Jeff Siddens has been promoted to Vice President of Heavy Civil. Mr. Siddens has worked for Facchina for the past eight years and has accomplished major projects including the 11th Street Bridge design-build project, among others. Prior to this promotion, Jeff served as the company's Heavy Highway Division Manager during which time he provided strategic planning for long-term growth of heavy/civil operations.

Jeff has a B.S. in Civil Engineering from Southern Illinois University. "I look forward to contributing to many years of strategic organizational growth, every individual's personal growth, hard work and success. It is my personal goal to serve Facchina with pride, commitment, passion, and straightforward integrity," Mr. Siddens said.

"Paul and Jeff have played a critical role in Facchina's success in Concrete and Heavy Highway construction work respectively over the years, and we are looking forward to further utilizing their experience and expertise in these areas as they take on their new roles," said Charles McPherson, President and CEO of Facchina.

**About Facchina**

Operating since 1987, Facchina is one of the East Coast's most diversified construction contractors. The company specializes in highway, bridge, and specialty concrete construction, as well as commercial building, multifamily construction and more. For 29 years, Facchina has successfully delivered some of the most high profile and challenging projects along the East Coast. As a result of their innovative solutions and superior planning, the organization has a reputation of completing projects on budget and on schedule while providing the highest level of quality and safety. The firm's unique approach to construction services is supported by their innovative staff of seasoned industry professionals, including Certified General Contractors, Professional Engineers, and LEED Accredited Professionals located in offices from the Washington, D.C. area down to Miami.
