

## **FOR IMMEDIATE RELEASE**

### **Power Design, Inc. Celebrates 25 Years as a Top National Electrical Contractor**

*St. Petersburg, Fla., September 23, 2014* – Power Design, Inc., a national electrical contractor founded and based in St. Petersburg, Fla., celebrates its 25<sup>th</sup> anniversary this month. A business that began at a dining room table in 1989 has grown into a 70,000-square-foot facility, with more than 675 employees operating in 19 states across the country and accumulative revenue of \$1.7 billion.

From the beginning, Power Design's foundation was built on nonnegotiable values and the belief that long-term relationships would be essential to success. It wasn't long before Power Design earned the reputation of "doing things differently", implementing processes that made sense as opposed to what was customary or traditional.

It was that forward-thinking approach that enabled Power Design to maintain significant growth and success in an ever-changing construction climate, even during trying times. Rather than merely surviving the downturn, often referred to "The Great Recession", Power Design proudly used this time to analyze and address areas for improvement. Major accomplishments that followed include the opening of a 12,000-square-foot training and evaluation center with jobsite simulations, along with best practices and leadership management initiatives.

"I want to personally thank our dedicated employees, customers and business partners that have helped to make this vision possible", said Power Design CEO, Mitch Permuy. "We are committed to continued growth of our organization, holding strong to the principles that have guided us for the past 25 years." As Power Design's 25<sup>th</sup> anniversary month nears the end, the outlook remains bright, with more than 130 active projects and a record number of contract awards in 2014.

#### **About Power Design, Inc.**

With more than 130 active projects, a 70,000-square-foot national headquarter facility, a 100,000-square-foot distribution center and accumulative revenue exceeding \$1 billion dollars, Power Design is one of the top electrical contractors in the United States. With a 12,000-square-foot training center dedicated to core training and hands-on simulation experiences to provide real-life applications, Power Design is at the forefront of innovative training practices and techniques.

Since founded in 1989, Power Design has operated as a family-run business built on an unbending foundation of quality service and loyalty to our employees and customers. Our commitment to customer service has enabled us to partner with the top 100 general contractors as ranked by Engineering News-Record (ENR).
